

EUROPEAN UNION

Delegation of the European Union to South Africa

17 December 2009

## Press Release

.../ for immediate release

### **Joint statement of the EU Presidency and the European Commission on the state of play of the climate change negotiations in Copenhagen**

The European Union is concerned by the lack of progress in the negotiations. We encourage all parties to urgently go to the outer limits of their flexibility so that talks can move forward.

The European Union has put concrete proposals on the table and maintains its conditional offer to do more, if others, especially the major emitters, improve their offers as well.
